KITCHEN PLANNING BOOK

Harmony House Kitchen Shown in White Steel

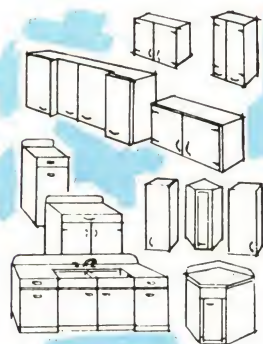

When you plan your kitchen think of this name.....

For years this name has stood for highest quality at the lowest price. Since the average homemaker spends 60% of her day in the kitchen, this room should be carefully planned and coordinated. To help make your kitchen a beautiful, pleasant, more convenient place to spend your time, Sears has prepared this Kitchen Planning Book. In it, you'll find the newest concepts in kitchen design and convenience, along with Sears complete assortment of cabinets, built-in appliances, and accessories.

*The items and services herein
are available at all
Sears retail stores and
Catalog Sales Offices.*

Only Sears offers all these advantages

Lowest Prices

For more than 70 years Sears has been saving its customers money. Now Sears puts this know-how to work for the homemaker who wants a modern, quality kitchen at the lowest price.

Most Complete Assortments

Choose from our many types of cabinets in wood or steel, designed for complete versatility and modern convenience. Everything you can use in a kitchen, you can buy at Sears.

Free Planning

Our kitchen planning experts will draw plans to scale to suit your needs and supply you with a free sketch. Or, you can design your own kitchen using the helpful hints in this book.

Installation

Sears will arrange for low cost installation of your new Harmony House kitchen. If you prefer to "do it yourself," Sears' easy-to-install cabinets come with complete instructions.

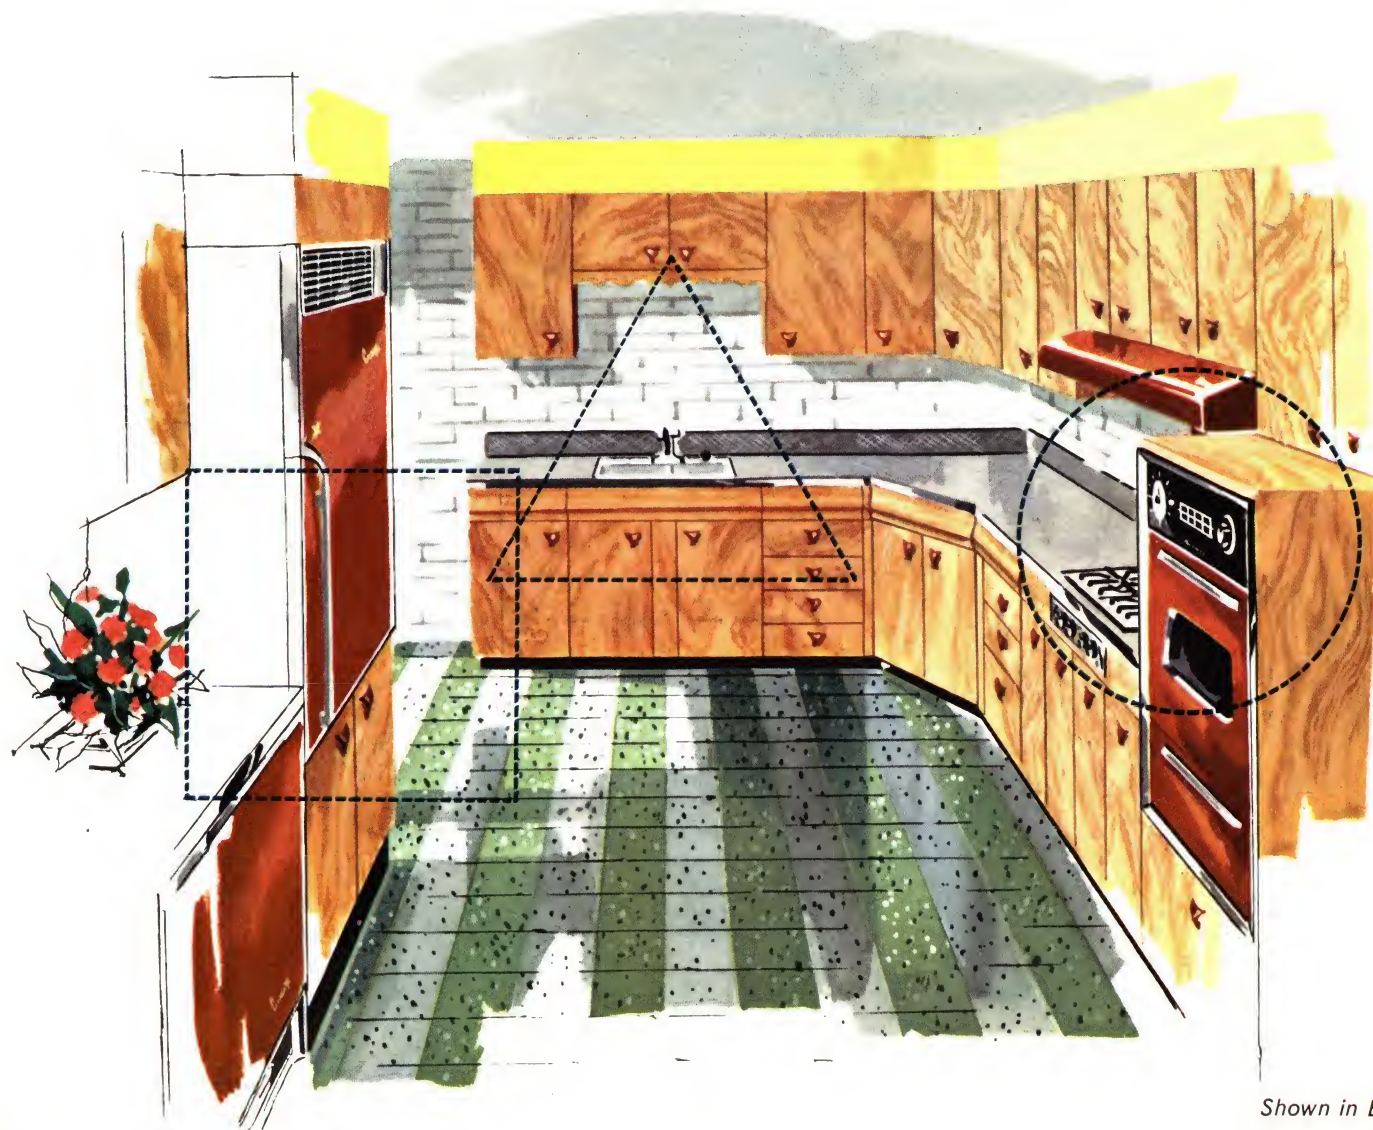

"One Package" Contract

Includes materials installation and financing. You can start enjoying your kitchen now, for only a few dollars a month on Sears Modernizing Credit Plan or Sears Easy Payment Plan.

Sears Famous Guarantee

When you buy a Harmony House Kitchen you're protected by Sears famous guarantee of complete satisfaction plus a written guarantee against defects in materials and workmanship.

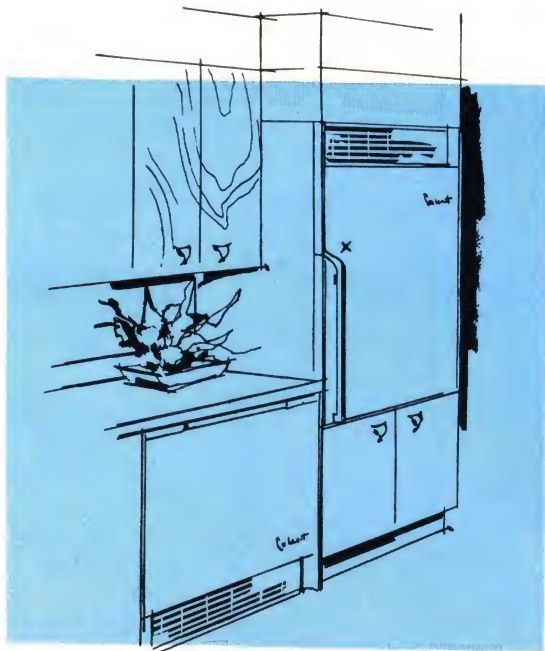

Build your complete kitchen . . . step by step with our

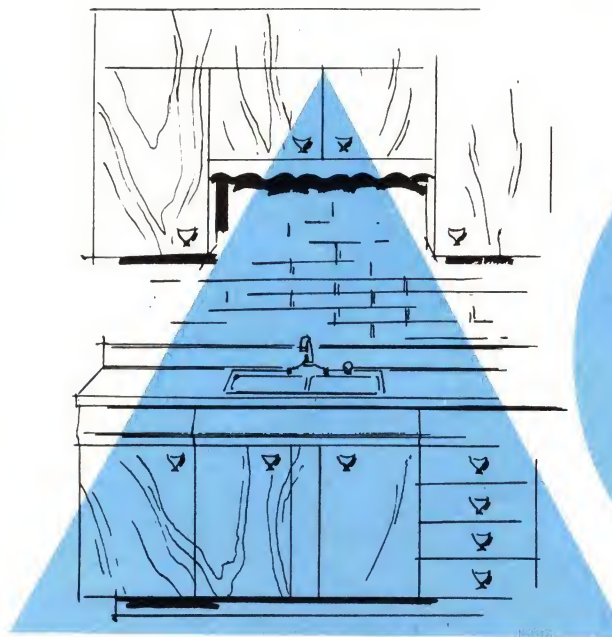

Shown in Birch

versatile *Kitchen Centers*

The flexible design of Harmony House kitchen centers enables you to add them one at a time as the budget allows. Start with a sink and cleaning center, a cook and serve center or a store and mix center . . . whichever your present kitchen needs the most. With this new concept in planning, you can spread the cost of your kitchen over a longer period of time. Sears standardized construction and versatile cabinet design make this step-at-a-time installation program possible.

Store and Mix Center

Sink and Cleaning Center

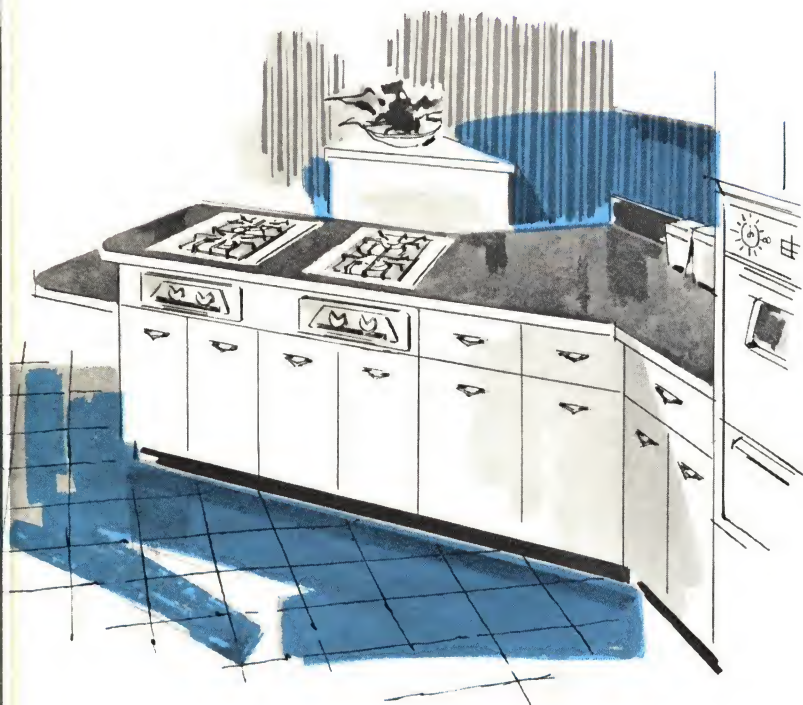

Cook and Serve Center

The newest concept in built-in convenience

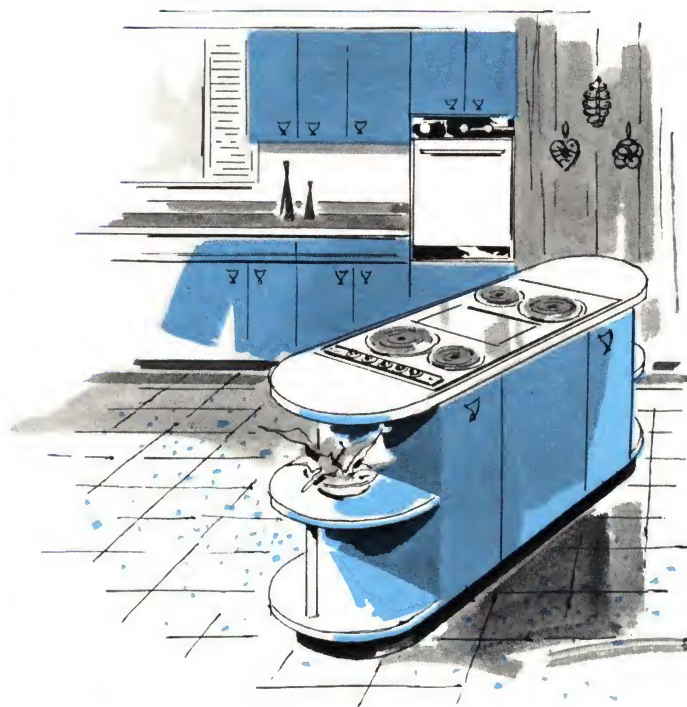

*"In Line" Center
(Shown in Vertical Grain Fir)*

... the complete *Cooking Center*

Peninsula Cooking Center

Lets you serve from either side. Acts as a room divider between kitchen and dining area.

Island Cooking Center

The last word in convenience. Accessible from any side. Perfect for larger kitchens.

Step Saving—No more running from oven to range to table. Every cooking need is conveniently located.

Easy to Reach—No more bending, stretching or kneeling. All your cooking or baking is done waist-high.

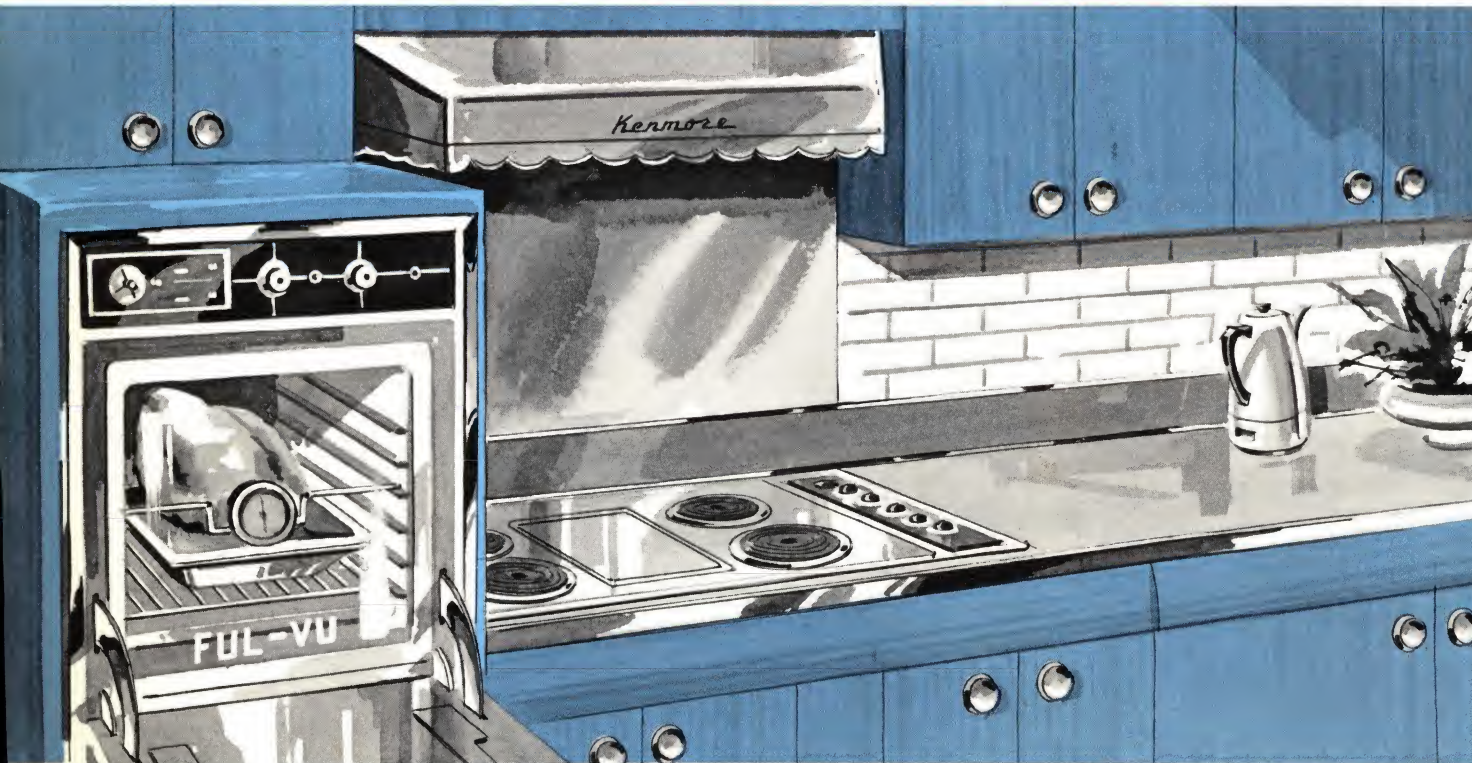

Quickly Installed—No tricky or costly installation problems. Let us show you how easy it is to do it yourself.

A Breeze to Clean—All cooking surfaces are easily accessible for cleaning or can be removed for washing.

Modern *Kenmore built-in ranges*

ELECTRIC

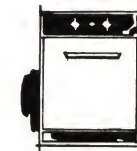

Kenmore Electric Built-in Cooking Units Take all the Guess-Work Out of Meal Preparation

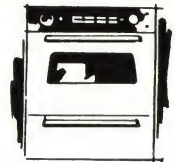

2-Element Unit, one 1250, 2700 watt. Controls have 7 positions.

4-Element Unit, two 1250-watt, one 2100-watt and one 2700-watt.

17-In. Standard Oven for baking or broiling. Thermostatic control.

24-In. Visi-Bake Oven has removable glass for easy cleaning.

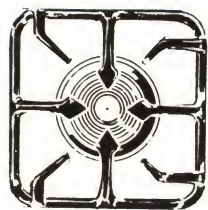

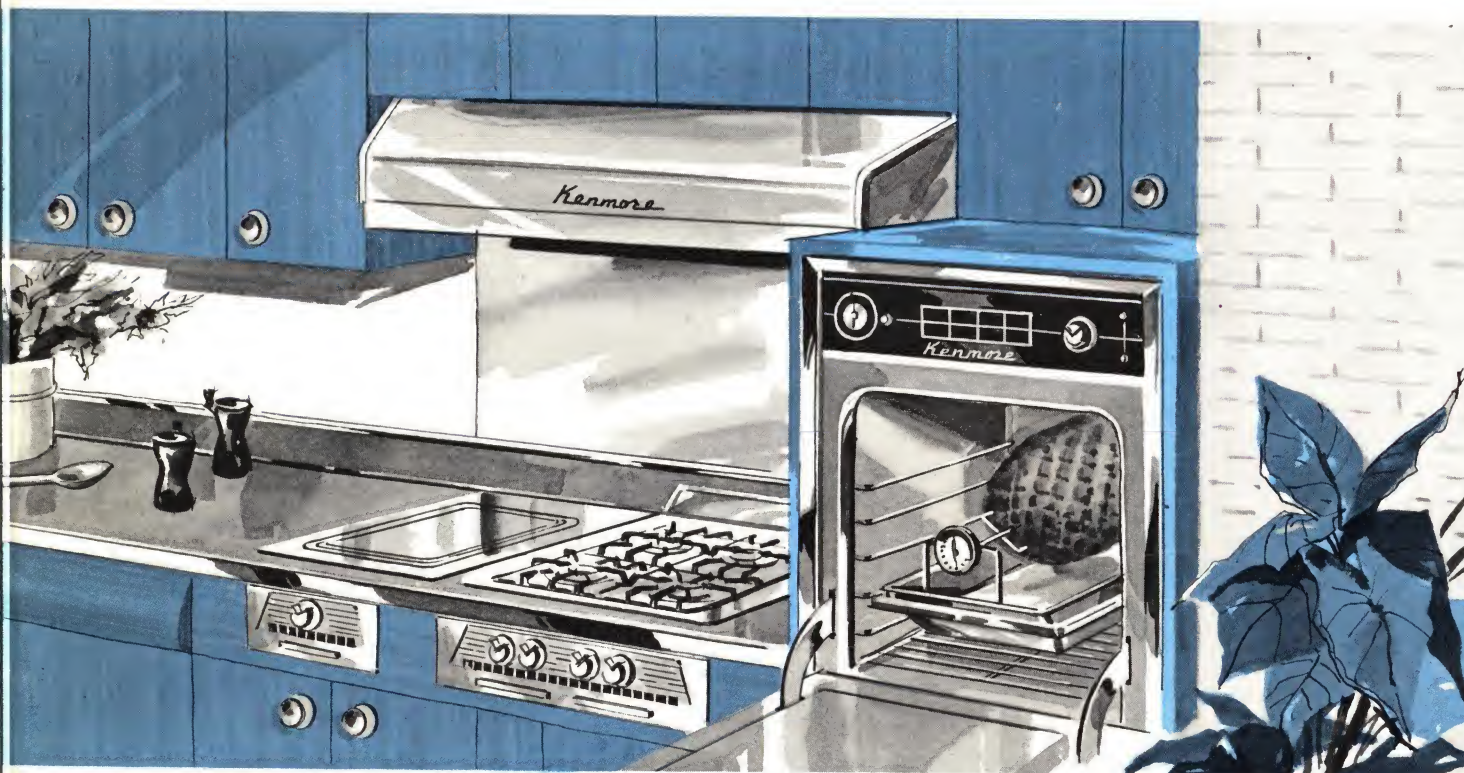

Here is real cooking luxury. The years-ahead design of this Kenmore Electric Cooking Center embodies such modern features as these: the new Ful-Vu door that lets you see the entire oven interior, the new Roto-Meat-R Spear that tells you the inside story of the meat while it's cooking; a 5-element surface unit with big built-in aluminum griddle that is easily removed for washing. All this plus a simple, modern design that blends in with any kitchen decor.

Choose from 2 Styles of Kenmore Hood Fans—Available in scalloped or modern trim in five finishes to blend with your kitchen. Powerful Kenmore Turbo-Flo fans instantly exhaust all odors, heat and grease vapors to keep your kitchen garden-fresh at all times. All units are ready to install.

reflect both glamorous and functional design

GAS

This Kenmore Built-in Gas Cooking Center works for you in many ways! Roasts are turned into delicious main courses on Oven Rotisserie. Automatic! Clock starts oven while you shop. Burner-with-a-Brain automatically raises and lowers flame for perfect heat control. Other features include smokeless broiler, large aluminum griddle, five heat controls on burner units. All oven units are available in copper or satin chrome to complement your kitchen.

Kenmore Gas Built-in Cooking Units with all the Latest Convenience Features

Smokeless Broiler for "charcoal" flavor. Pan removes for cleaning.

2-Burner Unit has one 1200 and a quick-heating 9000 BTU burner.

New Visi-Bake Oven available on "matchless" models.

17-In. Standard Oven has electric clock, 60-min. Ken-Timer.

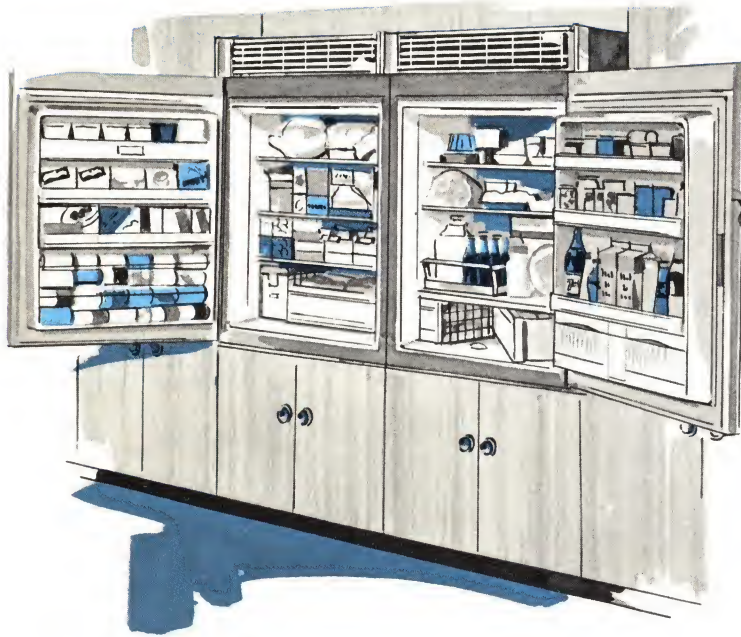

NO MONEY DOWN on Sears Modernizing Credit Plan—for either gas or electric units. Also can be purchased on Sears Easy Payment Plan. All ovens and surface units carry Sears famous guarantee. Ask any salesman for complete details.

Built-in beauty plus "no-frost" cooling in...

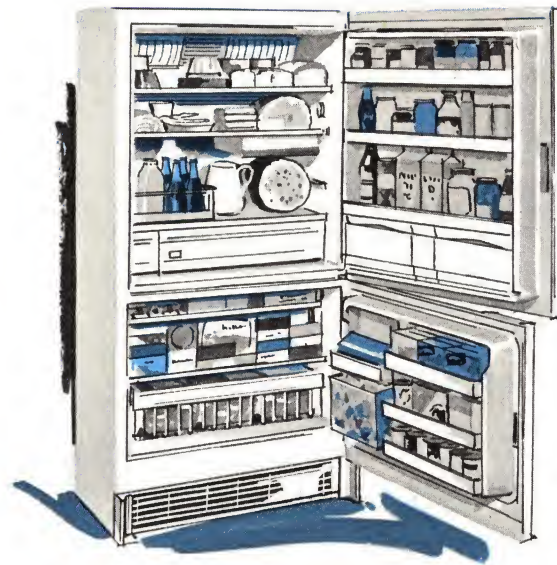

Coldspot Twins (Cabinets Shown are Vertical Grain Fir)

Coldspot Refrigerators and Freezers

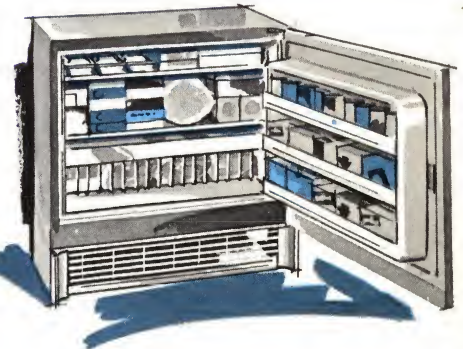

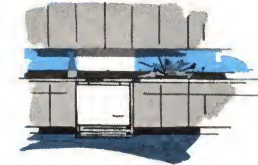

Coldspot Refrigerator and Freezer Twins

Look built-in, yet merely set on cabinets. Have 11 cu. ft. capacity each. Can be placed side by side or separated as shown in kitchen at left.

Coldspot Upright Refrigerator-Freezer

Fits flush between cabinets . . . looks like custom installation. Has big 18 cu. ft. total capacity plus "no-frost" cooling.

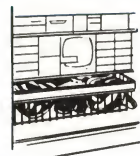

Coldspot Under Counter Freezer

Holds 212 lbs. Adjustable shelves, 3 door racks, plus "no frost" cooling. Fits neatly between cabinets.

Swing-Out Crisper
holds 23 quarts of garden fresh produce.

Freezer Basket rolls out for easy loading right from your shopping bag.

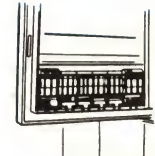

Auto-Cube Dispenser
tumbles crisp ice cubes into slide-out server.

Roll-Away Half Shelf
can be moved to make room for bulky items.

Bottle Basket rolls at a touch. Holds gallon bottles and pitchers.

Juice Rack lets you load juices from top, remove from bottom.

... individually

designed to reflect your own discriminating taste

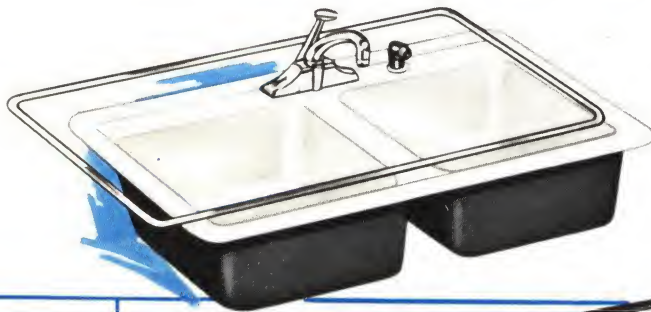

Incomparable **Harmony House Custom Kitchens**

Nowhere in your home is your taste and personality reflected so vividly as in your kitchen. As every wise homemaker knows, the kitchen is more than just a place to cook . . . it's the heart of her home, and the focal point for the entire household. Only Sears superior quality custom kitchens embody the perfection of workmanship, grace of design and fine engineering features to complement your own discriminating taste in every detail.

Make your sink and cleaning center both useful and glamorous

On Sears Easy Payment Plan or ask about No Money Down on Sears Modernizing Credit Plan

It's easy to plan your kitchen with Sears *Expert Help*

By working closely with Sears Kitchen Planning Experts and following these basic planning rules, you can transform your old kitchen to suit your individual needs

A Sears planning expert will assist you in taking complete measurements

He will design a kitchen based on these measurements—your own needs

Our planning expert will work out a complete list of materials and cost

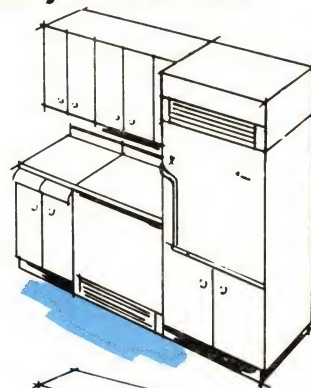

We will prepare an accurate floor plan and sketch of your new Harmony House Kitchen

The 3 main centers of your kitchen

Store and Mix Center

Build this center around the refrigerator. Plan cabinets above and to the side of the refrigerator, with counter space for mixing foods and under-counter space for storing today's modern equipment.

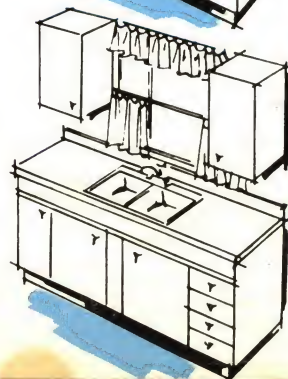

Cook and Serve Center

Allow plenty of storage space around the range. Plan enough cabinets to hold spices, cookware, etc. Allow for counter space on both sides of range, if possible. Locate center near dining area.

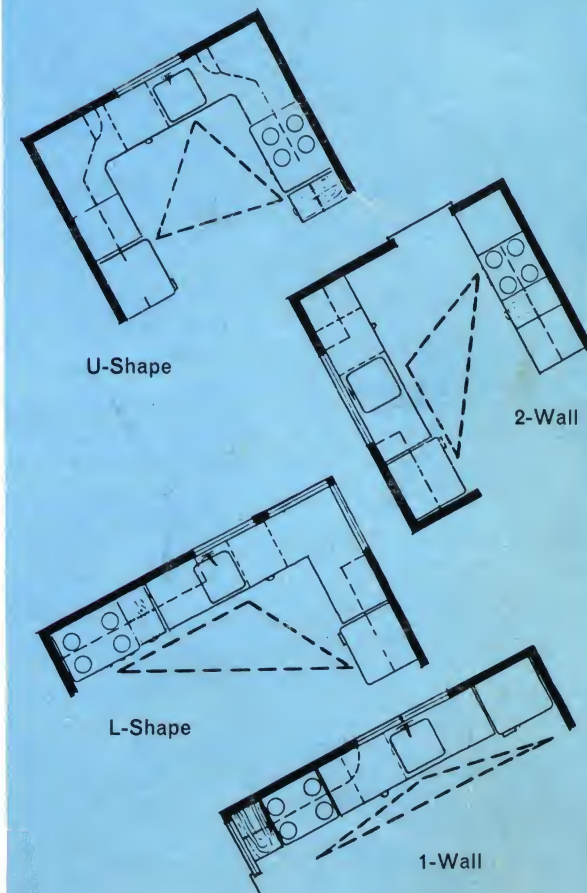

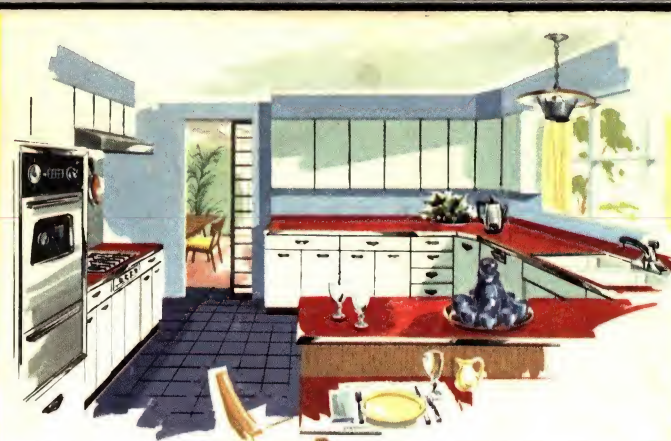

Sink and Cleaning Center

Plenty of wall and base cabinet space is essential here. You'll need counter space on both sides of the sink for cleaning and for mixing foods that call for water. Allow for maximum storage space below.

Arrange Storage, Cooking, and Clean-Up Areas in a Step-Saving Triangle (as shown below) for Top Efficiency

Cool Exposure Kitchen

A cool exposure is one that gets little or no direct sunlight. Use a good area of warm colors here to prevent a chilly effect.

Warm Exposure Kitchen

A warm exposure is one where direct sunlight comes from windows facing south, west or southwest. Use a good area of cool colors here.

Balanced Exposure Kitchen

An exposure like this gets warm light from the sun, cool light from the sky. Mix warm and cool colors to suit your taste.

What's the right color scheme for your kitchen?

Color Planning is Easy the Harmony House way!

Yes, by following a few simple principles the Harmony House method can give you just the right color scheme for your kitchen.

Begin with the Exposure

Your exposure is determined by the direction your windows face. For cool exposure, use warm colors, for warm, use cool colors, for balanced, use a mixture of color.

Size of the Room Makes the Difference

For larger rooms a bold pattern and bright colors may be used in floor coverings, wallpaper or curtains. An average size room calls for less pattern. Use softer colors for large areas and bright colors to accent your kitchen.

Got a Special Problem?

If you have a special kitchen problem, let our planning experts help you solve it. We can arrange for any special installation jobs such as breakfast bars, desks, etc. Other woods and finishes may also be available from your local Sears store or catalog sales office. No matter what your individual installation problem, Sears can help you.

12

easy steps to installing your own Harmony House kitchen cabinets

Follow these Basic Rules

- Locate position of all wall studs where cabinets are to hang by tapping with hammer. Mark position.
- Find highest point on floor with a level. This is important for both base and wall cabinet installation later.
- Find the high spots on the wall where cabinets are to be installed. In many cases these spots can be sanded down.
- Measure up wall from highest point on the floor. Make horizontal line along wall where you want the top of the wall cabinets.

You are now ready to install your Harmony House Kitchen. Simply follow these 12 easy steps.

- 1** Remove base board from all walls where cabinets are to be installed. This will allow them to go flush against walls.

- 2** Start installation with a corner or end unit. Slide it into place and then continue by sliding other base cabinets in.

- 3** Fasten base cabinets together just in back of leading edge with screws for wood cabinets, bolts for steel cabinets.

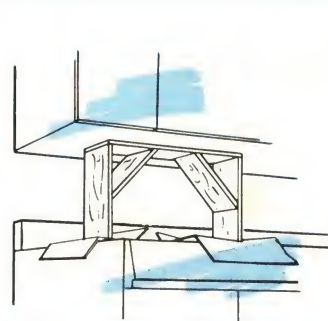

- 4** Check position of each cabinet with spirit level. Go front to back. Next, shim for a perfect base cabinet installation.

- 5** Repeat leveling process on leading edges of cabinets. Continue to shim until all base cabinets have been brought to level.

- 6** Fit counter top into position on base cabinets and attach. Cover counter top for protection while the wall cabinets are being installed.

- 7** Position wall cabinets 15 to 18-in. above base cabinets. Use brace or support to hold cabinets while fastening.

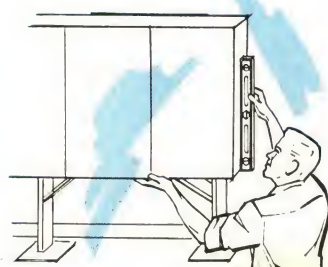

- 8** Start your installation with corner or end cabinets. This cabinet is the key for entire installation so use care.

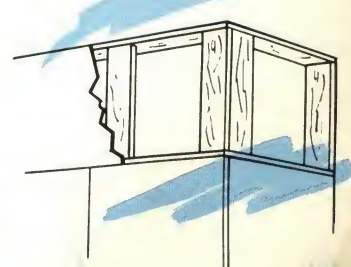

- 9** Temporarily secure the adjoining wall cabinets so that leveling may be done without removing them. Make them one continuous unit.

- 10** Use spirit level to check horizontal surfaces. Shim at the wall until each cabinet is level, if doors are to fit properly.

- 11** Check perpendicular surface of each frame at the front. Shim between cabinets to level up. Now permanently attach cabinets.

- 12** If you are using 30-in. wall cabinets, you can customize your kitchen by building a soffit (boxed-in top section).
